Tables » Dining Height Tables

Where conversation and collaboration converge. Sturdy, refined surface suited to outdoor dining, study, and gathering. Clean profile integrates seamlessly with both straight and curved seating configurations.

Description

Avenue Form Table delivers a sturdy, refined surface suited to outdoor dining, study and gathering. The clean profile integrates easily with both straight and curved seating. Table battens are available in anodised, powder-coated, or Alugrain timber-look finishes that reduce reliance on hardwood while retaining natural warmth.

Avenue Form Tables extend the Avenue Form collection's refined language into spaces for gathering, dining and collaboration. Clean lines and a disciplined profile create a confident architectural presence, integrating seamlessly with both straight and curved seating configurations. Designed to anchor activity, the tables bring structure and purpose to plazas, campuses, and public environments.

A signature bullnose detail to the two outer battens softens the edge, while reinforcing the collection's crafted architectural character. Aluminium battens are available in anodised, powder-coated, or Alugrain finishes in timber-look options that reduce reliance on hardwood while retaining natural warmth.

Inclusive by design, considered proportions and generous clearances support comfortable use across a range of public settings. The AS 1428.2 compliant high table option ensures access and ease of approach, enabling inclusive dining and shared experiences without visual compromise.

Designed and manufactured in Australia, Avenue Form Tables are built for the pace and intensity of contemporary urban life. Robust aluminium construction delivers enduring performance, while a considered palette of finishes allows each installation to respond to its context with cohesion and clarity.

Available in Anodised, Powder-coated (Select from Core powder coat colours) and Alugrain (Curly Birch or Golden Gum) is part of b+g's Essential Collection delivering favourable pricing and leadtimes.

How to Specify

1. Select Batten finish - Aluminium - Anodised , Powder-coated or Alugrain.
2. Select Frame Powder-Coat colour.

Sustainability

We locally source our steel and aluminium. It means we know it uses recycled content and is 100% recyclable.

Finishes

Anodised Aluminium | Powder Coat | Alugrain

AVENUE FORM TABLE

Care Instructions	**Powder-coat** : Regular cleaning helps protect the long-term appearance of powder-coated finishes. Wash surfaces with warm water and a non-abrasive, pH-neutral detergent, using a soft cloth or brush, then rinse thoroughly. Avoid harsh solvents, abrasive cleaners and high-pressure washing, as these may damage the coating. In coastal, marine or industrial environments, increase cleaning frequency to minimise the build-up of salts and pollutants which can accelerate weathering. **Anodised**: Anodised aluminium requires only light, periodic cleaning to maintain its appearance. Wash with warm water and a mild, pH-neutral detergent using a soft cloth or sponge, then rinse thoroughly with fresh water. Avoid abrasive pads, alkaline cleaners, acidic products and solvents, as these can mark or dull the anodised surface. In coastal or industrial locations, increase cleaning frequency to prevent build-up of salts or contaminants and preserve long-term finish quality. **Alugrain**: Alugrain timber-look finishes require low maintenance and should be cleaned periodically with warm water and a mild, non-abrasive detergent. Use a soft cloth or soft brush and rinse thoroughly to maintain the wood-grain appearance. Avoid abrasive cleaners, solvents or high-pressure washing, as these may damage the decorative coating. In high-exposure environments, increase cleaning frequency to preserve colour and surface integrity.
Warranty	5-year warranty. View the warranty for more details.
Customisable	As this item is made to order locally, customisation is available on request.
