AVENUE FORM CURVED PLINTH SEAT CONCAVE

Concave plinth seating creates gathering destinations where people naturally converge. Ergonomic profile encourages interaction in collaborative zones and landscaped pockets.

Description

Avenue Form Curved Plinth Seat Concave offers inward-facing curvature that encourages small group interaction when mounted to a plinth. The ergonomic profile and durable aluminium construction make it suitable for collaborative zones and landscaped pockets. Aluminium battens are available in anodised, powder-coated, or Alugrain timber-look finishes that reduce reliance on hardwood while retaining natural warmth. Backrests are available in powder-coated or anodised finishes.

Avenue Form reinterprets traditional public seating through a refined contemporary lens. At its core, Avenue Form gives designers the freedom to shape the landscape, not simply furnish it. Straight, concave, and convex geometries form a flexible framework that defines edges, guides movement, and introduces structure to open ground planes. Modular clarity allows thoughtful configurations that create flow, establish gathering pockets, and transform underutilised areas into intentional destinations.

A signature bullnose detail to the two outer battens softens the seating edge, enhancing comfort while reinforcing the collection's crafted architectural character.

Inclusive by design, thoughtful seat heights, supportive backrests, softened edge detailing, and generous proportions enhance everyday comfort, while AS compliant options ensure access for all.

Designed and manufactured in Australia, Avenue Form is built for the pace, density, and diversity of today's urban environments. Robust aluminium construction delivers enduring performance, while a considered palette of finishes allows each installation to respond to its context with cohesion and clarity.

How to Specify

1. Select Batten finish - Aluminium - Anodised , Powder-coated or Alugrain.
2. Select Frame Powder-Coat colour.

Sustainability

We locally source our steel and aluminium. It means we know it uses recycled content and is 100% recyclable.

Finishes

Anodised Aluminium | Powder Coat | Alugrain

Care Instructions	**Powder-coat** : Regular cleaning helps protect the long-term appearance of powder-coated finishes. Wash surfaces with warm water and a non-abrasive, pH-neutral detergent, using a soft cloth or brush, then rinse thoroughly. Avoid harsh solvents, abrasive cleaners and high-pressure washing, as these may damage the coating. In coastal, marine or industrial environments, increase cleaning frequency to minimise the build-up of salts and pollutants which can accelerate weathering. **Anodised**: Anodised aluminium requires only light, periodic cleaning to maintain its appearance. Wash with warm water and a mild, pH-neutral detergent using a soft cloth or sponge, then rinse thoroughly with fresh water. Avoid abrasive pads, alkaline cleaners, acidic products and solvents, as these can mark or dull the anodised surface. In coastal or industrial locations, increase cleaning frequency to prevent build-up of salts or contaminants and preserve long-term finish quality. **Alugrain**: Alugrain timber-look finishes require low maintenance and should be cleaned periodically with warm water and a mild, non-abrasive detergent. Use a soft cloth or soft brush and rinse thoroughly to maintain the wood-grain appearance. Avoid abrasive cleaners, solvents or high-pressure washing, as these may damage the decorative coating. In high-exposure environments, increase cleaning frequency to preserve colour and surface integrity.
Warranty	5-year warranty. View the warranty for more details.
Customisable	As this item is made to order locally, customisation is available on request.
