Clean, linear seating built for high-use public environments. Lightweight aluminium and softened detailing deliver lasting durability across paths, plazas, and campuses.

Description

Avenue Form Straight Bench provides a clean, linear seating solution suited to high use public environments. The lightweight aluminium frame and softened detailing support long term durability and everyday comfort across paths, plazas, and campus settings. Aluminium battens are available in anodised, powder-coated, or Alugrain timber-look finishes that reduce reliance on hardwood while retaining natural warmth.

Avenue Form reinterprets traditional public seating through a refined contemporary lens. At its core, Avenue Form gives designers the freedom to shape the landscape, not simply furnish it. Straight, concave, and convex geometries form a flexible framework that defines edges, guides movement, and introduces structure to open ground planes. Modular clarity allows thoughtful configurations that create flow, establish gathering pockets, and transform underutilised areas into intentional destinations.

A signature bullnose detail to the two outer battens softens the seating edge, enhancing comfort while reinforcing the collection's crafted architectural character.

Inclusive by design, thoughtful seat heights, supportive backrests, softened edge detailing, and generous proportions enhance everyday comfort, while AS compliant options ensure access for all.

Designed and manufactured in Australia, Avenue Form is built for the pace, density, and diversity of today's urban environments. Robust aluminium construction delivers enduring performance, while a considered palette of finishes allows each installation to respond to its context with cohesion and clarity.

Avenue Form Straight Bench in Anodised, Powder-coated (Select from Core powder coat colours) and Alugrain (Curly Birch or Golden Gum) is part of b+g's Essential Collection delivering favourable pricing and leadtimes.

How to Specify

1. Select Batten finish - Aluminium - Anodised, Powder-coated or Alugrain.
2. Select Frame powder-coat colour

Sustainability

We locally source our steel and aluminium. It means we know it uses recycled content and is 100% recyclable.

Finishes

Anodised Aluminium | Powder Coat | Alugrain

Care Instructions

Powder-coat :

Regular cleaning helps protect the long-term appearance of powder-coated finishes. Wash surfaces with warm water and a non-abrasive, pH-neutral detergent, using a soft cloth or brush, then rinse thoroughly. Avoid harsh solvents, abrasive cleaners and high-pressure washing, as these may damage the coating. In coastal, marine or industrial environments, increase cleaning frequency to minimise the build-up of salts and pollutants which can accelerate weathering.

Anodised:

Anodised aluminium requires only light, periodic cleaning to maintain its appearance. Wash with warm water and a mild, pH-neutral detergent using a soft cloth or sponge, then rinse thoroughly with fresh water. Avoid abrasive pads, alkaline cleaners, acidic products and solvents, as these can mark or dull the anodised surface. In coastal or industrial locations, increase cleaning frequency to prevent build-up of salts or contaminants and preserve long-term finish quality.

Alugrain:

Alugrain timber-look finishes require low maintenance and should be cleaned periodically with warm water and a mild, non-abrasive detergent. Use a soft cloth or soft brush and rinse thoroughly to maintain the wood-grain appearance. Avoid abrasive cleaners, solvents or high-pressure washing, as these may damage the decorative coating. In high-exposure environments, increase cleaning frequency to preserve colour and surface integrity.

Warranty

5-year warranty. View the [warranty](#) for more details.

Customisable

As this item is made to order locally, customisation is available on request.
