TREE LINE

Seating » Benches

Modular monolithic seating. Organic-shaped linear and curved modules made of precast concrete with stone aggregate to suit many environments.

Description	Tree Line, designed by Pio & Tito Toso, is a stunning mix of organic curves, natural materiality with elegant modularity. This contemporary collection includes linear benches and seats in 2 sizes, a curved element and Y-shaped element to allow for a huge array of compositions. The solid precast concrete features white or grey granite and white or black marble stone aggregate for a touch of elegance. Tree Line is designed to be paired with the Lorenz collection for even greater flexibility.
How to Specify	Design your layout with your select modules Check the module directions match up Send your layout marked up with codes to Botton + Gardiner to review and quote
Dimensions	<p>Short bench 1000mmW x 750mmD x 460mmH</p> <p>Long bench 2200mmW x 750mmD x 460mmH</p> <p>Short seat 1000mmW x 750mmD x 795mmH Seat height: 460mm</p> <p>Long seat 2200mmW x 750mmD x 795mmH Seat height: 460mm</p> <p>120° curved bench 2070mmW x 1200mmD x 460mmH</p> <p>Y join module 1915mmW x 1625mmD x 460mmH</p>

Care Instructions

Precast Concrete

Cleaning

Remove any loose surface deposits with a brush.

Regularly wash the coating using a solution of warm water and non-abrasive, pH neutral detergent solution (with low wax content).

Thoroughly rinse the surfaces after cleaning to remove all residues. You can use a sponge, a soft bristle brush or pressure water cleaners. For pressure cleaners ensure you use cold or warm water and average pressure. Rinse after with fresh water and leave to dry.

Do not use abrasive sponges, discs, or brushes.

Do not use corrosive detergents, descaling agents, or acidic components (bleach, ammonia, vinegar, abrasive pastes).

For cleaning marks or solidified substances from the surface use slightly abrasive sponges for non-stick ceramic pans, accurately and lightly treat the parts to be cleaned as above. Please check with Botton + Gardiner for advice relating to cleaning special circumstances (i.e. stains from paint, acid, etc.) as required.

Maintenance

For surfaces prone to additional wear like that used for street furniture, regular treatment is recommended (at least every 2 years) with products containing high wax content. Evenly apply the product with a soft cloth and polish with a circular motion.

Avoid the products from being placed on surfaces subject to infiltrations or stagnant water puddles.

Warranty

5-year warranty. View the [warranty](#) for more details.

Additional Comments

Customisable

Wide variety of ways modules can be placed together allows for customisation of the configuration.

Options

The bench ends of the Treeline are both slightly angled and more elliptical than circular. This results in modular pieces needing to match directionally to fit together. See downloads tab for more information for end directions on each piece especially outlining direction in relation to the backrest locations for seats.

Upon request, if the product allows it, it is possible to perform polishing operations.

The finished products are treated with a revitalising varnish and, if requested, anti-graffiti treatment can be applied.
