How to Specify Select your fixing type

Care Instructions

Stainless Steel

Wash the surface regularly using warm water containing soap or mild detergents and rinse the surface with fresh water after cleaning.

When polishing the surface with a soft dry cloth to ensure all moisture is removed, follow the direction of the grain finish.

Use a brush or soft damp cloth to remove loose deposits. Use a cream cleanser and soft cloth for difficult deposits.

Use "Star Brite Rust Stain Remover" to remove tea staining and "Star Brite Chrome & Stainless Steel Polish" to protect the surface after cleaning.

Never use cleaners containing harsh abrasives or high bleach contents. Prolonged contact with chlorine-based cleaners will cause surface pitting, which cannot be repaired.

Never use abrasive materials such as scouring pads, steel wool or metallic scrapers.

For stubborn stains or where "deep cleaning" is required, a mild abrasive cleaner or rust remover may be required.

Customisable

Optional convex lid available if you wanted to designate a bin as recycling.

Additional Comments

Concave lid with 200mm diameter opening to assist with directing waste into the liner.

A loose, non-marking plinth is easy to use and flexibly move around without scratching or damaging your floors.

The smooth stainless body and spun lid are easy to clean and hygienic.
