Contemporary seat design with rounded details. Hardwood or Duraslat™ XG battens with a cast aluminium frame in 27 powder-coat colours or satin finish.

| | |
|----------------|--|
| Description | <p>With unifying, considered design details, the Contour Seat is a key piece in the contemporary Contour collection —commercial outdoor furniture built to withstand the diverse demands of public space.</p> <p>Defined by its curved profile and clean geometry, the Contour Seat brings an understated elegance to high-traffic outdoor environments. The nature-inspired form works seamlessly within the broader Contour family, complementing benches and tables across diverse settings.</p> <p>Optional armrests enhance comfort and accessibility, supporting inclusive use. The Contour Straight Bench is available in Hardwood or Duraslat™ XG battens, supported by a robust cast aluminium frame offered in 17 powder coat colours or a satin finish.</p> <p>Its cohesive design language, evident in its streamlined profile and softened edges brings an organic sensibility, making it an ideal choice for projects seeking durable, thoughtful furniture solutions.</p> <p>Contour Straight Bench in select finishes is part of b+g's Essential Collection delivering favourable pricing and leadtimes.</p> <p>Select from Core powder coat colours and battens in hardwood blackbutt or Duraslat™ XG to qualify.</p> |
| How to Specify | <p>Select your batten finish</p> <p>Select your frame finish</p> <p>Select your fixing type</p> |
| Sustainability | <p>Certified Hardwood All hardwood is sourced from sustainable forests certified by the Program for the Endorsement of Forest Certification (PEFC), the world's largest forestry certification system.</p> <p>Recycled Materials We locally source our aluminium and steel. It means we know it uses recycled content and is 100% recyclable.</p> <p>Duraslat™ XG is made from 90% of recycled hardwood fibres and reclaimed plastic materials, which reduces demand for virgin materials.</p> <p>Low Pollutants Our powder-coating process doesn't emit Volatile Organic Compounds (VOCs) and has Environmental Product Declarations (EPDs).</p> |

Care Instructions

Hardwood

Cleaning

Remove any loose surface deposits with a soft bristled brush and wipe down with fresh water and a non-abrasive cloth.

Oiling

Oiling of timber will postpone natural greying, repel moisture, improve mould resistance, help maintain a smooth surface texture and enhance the grain and colour.

To maintain, lightly sand rough areas of timber and brush on one coat of timber decking oil every 6 months or as required.

Duraslat™ XG

Cleaning

Simply wash down occasionally. Do not use high pressure cleaners.

Powder-Coat

Cleaning

Carefully remove any loose surface deposits with a wet sponge or soft bristled brush.

Use a soft (non-abrasive) cloth or brush and a diluted solution of mild detergent and warm water.

Ensure surfaces are thoroughly rinsed with clean fresh water after cleaning to remove all residues.

Never use thinners, abrasive cleaning agents, alcohol-based, acid or alkali cleaning agents.

Hot-Dip Galvanised Steel

For general cleaning of bulk contaminants such as dirt and the like, ordinary laundry soaps can be satisfactorily used.

For more stubborn or larger areas, the use of a low-pressure wash (eg. a gurney gun) with just pure water or in conjunction with proprietary cleaning materials, such as car wash or truck wash, can be effective. It is important that the steel be washed down with fresh water after cleaning.

The cleaning treatment of the galvanising should be conservative at first and then if the situation demands, the treatment can become steadily more aggressive. Also, wherever some form of mechanical abrasion or “scrubbing” is required, the use of a hard, plastic bristle brush is recommended. Steel bristle brushes are not to be used since they will cause discolouration.

Mechanical methods of cleaning zinc surfaces can cause aesthetic issues. The “cleaned” areas are likely to contrast with adjacent untreated surfaces and may take a significant period of time to weather to a uniform colour. If aesthetics is a large concern, it is advisable to first test the cleaning method in an inconspicuous area in case the aesthetic effect is unappealing.
