PROSPECT BIN CORRAL DOUBLE

PROSPECT BIN CORRAL DOUBLE

Robust double wheelie bin enclosure ideal for parklands.

Description

Prospect Bin Corral Double is a high-capacity waste enclosure designed for durability and impact in remote or unsupervised environments. With its robust construction and distinctive asymmetrical corner detailing, Prospect offers a bold, practical solution for parklands, streetscapes, and regional public spaces.

The enclosed design helps regulate the type and size of waste being deposited, reducing misuse and overflow. Built with a galvanised steel frame and finished with Duraslat™ XG battens, Prospect is engineered to withstand the elements while maintaining a strong architectural presence..

How to Specify

Select your batten finish - Duraslat™ XG

Select your door opening orientation

Select any optional extras

Sustainability

Recycled Materials
We locally source our steel. It means we know it uses recycled content and is 100% recyclable.

Duraslat™ XG is made from 90% of recycled hardwood fibres and reclaimed plastic materials, which reduces demand for virgin materials.

Low Pollutants
Our powder-coating process doesn't emit Volatile Organic Compounds (VOCs) and has Environmental Product Declarations (EPDs).

Assembly & Delivery	This item comes delivered in parts and the assembly is part of the installation process. Instructions are supplied.
Fixing Detail	Surface fixed by others. Anchors not included. Supplied knocked-down; assembly and installation by others

PROSPECT BIN CORRAL DOUBLE

Care Instructions	Duraslat™ XG Simply wash down occasionally. Do not use high pressure cleaners. Hot-Dip Galvanised Steel For general cleaning of bulk contaminants such as dirt and the like, ordinary laundry soaps can be satisfactorily used. For more stubborn or larger areas, the use of a low-pressure wash (eg. a gurney gun) with just pure water or in conjunction with proprietary cleaning materials, such as car wash or truck wash, can be effective. It is important that the steel be washed down with fresh water after cleaning. The cleaning treatment of the galvanising should be conservative at first and then if the situation demands, the treatment can become steadily more aggressive. Also, wherever some form of mechanical abrasion or "scrubbing" is required, the use of a hard, plastic bristle brush is recommended. Steel bristle brushes are not to be used since they will cause discolouration. Mechanical methods of cleaning zinc surfaces can cause aesthetic issues. The "cleaned" areas are likely to contrast with adjacent untreated surfaces and may take a significant period of time to weather to a uniform colour. If aesthetics is a large concern, it is advisable to first test the cleaning method in an inconspicuous area in case the aesthetic effect is unappealing.
Warranty	5-year warranty. View the warranty for more details.
Customisable	The Prospect bin corral is locally made and customisable to suit your requirements.
Additional Comments	Doors can open to the front or rear of the units depending on the best access for your location. Compression lock prevents door rattling.
