

PROSPECT DRINKING FOUNTAIN

URBAN + STREET - DRINKING FOUNTAINS

Lead Time: 6-8 weeks

Made In: Australia

Price: \$\$\$

Suitable for: Marine , Streetscape

DESCRIPTION / FEATURES

The Prospect Drinking Fountain is a unique, contemporary design. The marine grade 316 stainless steel frame undergoes electro polishing before select faces are hand polished to a mirror finish. These processes ensure the highest level of corrosion resistance, making it suitable for the most extreme environments. Featuring high quality, readily serviceable off-the-shelf components, the bubbler and time delay bottle fill tap give reliable service in all environments. Our signature factory fitted bubbler button cap has been specially designed to improve tamper resistance and shield the internal flow cartridge from sand and grit, allowing for longer life span. The self-draining and levelling dog bowl allows for ease of use for your best mate whilst preventing stagnant water collecting, and is easily emptied by foot via the handle. The perforated grate covers the drainage sump for safety whilst still allowing optimal drainage to keep the slab clear of excess water. The fountain is available in 4 configurations featuring combinations of these features to suit your requirements, and conforms to the Australian disabled access standard.
